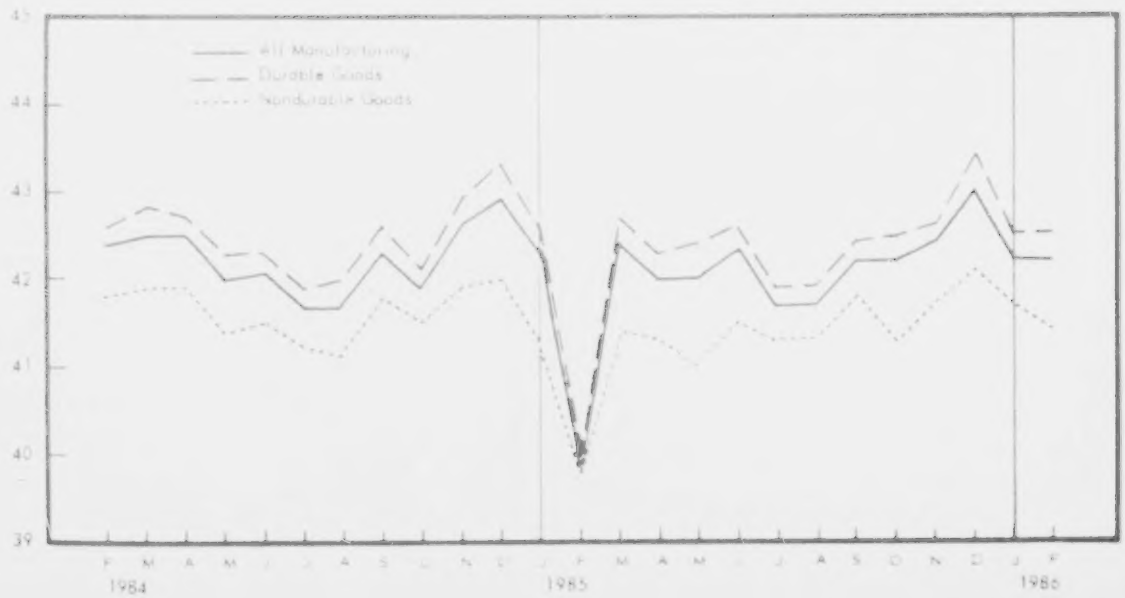
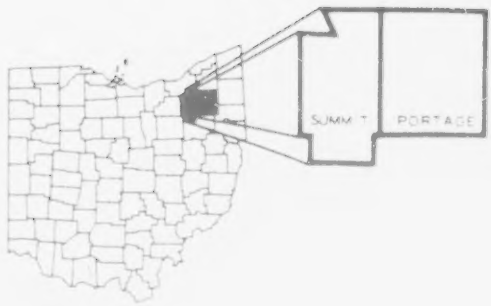
[a]See Technical Notes for concepts. [p]Preliminary. [r]Revised. [e]Based on unrounded figures. [f]Includes miscellaneous manufacturing. [g]Includes tobacco manufactures, textile mill products, petroleum and coal products, leather and leather products. [h]Money payments only; tips not included. [i]Includes State universities, State schools for deaf and blind, and the State library. Excludes hospitals, the agricultural extension service, agricultural research centers, and the Ohio Department of Education. [j]Depressed due to labor-management disputes.

AVERAGE WEEKLY HOURS OF PRODUCTION WORKERS IN OHIO MANUFACTURING INDUSTRIES



AKRON
PRIMARY METROPOLITAN STATISTICAL AREA



Nonfarm wage and salary employment in Akron totaled 258,200 in February, up 200 from January. Nonmanufacturing advanced 400 over the month, as sizable increases in state and local schools and colleges were offset by seasonal declines in employment in retail trade and construction. In manufacturing, gains in rubber and plastics products were overshadowed by losses in durable goods, especially fabricated metal products and nonelectrical machinery. Manufacturing production workers had an average workweek of 42.9 hours, up .2 hours from January. Their earnings averaged $11.16 per hour, up $.06.

Nonagricultural employment rose 6,900 from February 1985. Employment was up in all nonmanufacturing divisions, especially services and retail trade. Losses in tires and inner tubes and fabricated metal products helped reduce manufacturing employment by 2,000 over the year.

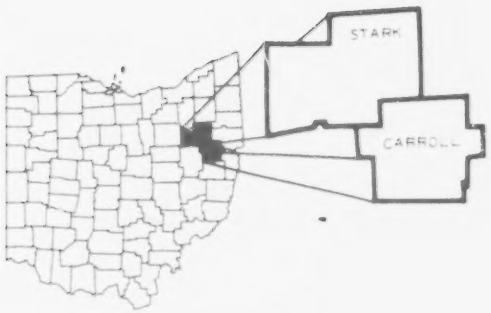
CANTON
METROPOLITAN STATISTICAL AREA



February nonagricultural wage and salary employment in the Canton area, at 152,400, was unchanged from January. Employment in nonmanufacturing dropped seasonally, with reductions in retail trade and construction more than offsetting gains in services and local schools. In manufacturing, settlement of a labor-management dispute and returns from layoffs boosted employment in durable-goods industries. Production workers had an average workweek of 40.2 hours in February, up .1 hours from January. Their average earnings were $11.13 per hour, down $.10.

Nonagricultural employment rose 5,500 between February 1985 and February 1986. Increases in retail trade, services, and construction accounted for the improvement. Manufacturing employment rose just 100 over the year, as gains in food products and primary metals were nearly offset by losses in fabricated metal products.

CINCINNATI
PRIMARY METROPOLITAN STATISTICAL AREA

Nonagricultural wage and salary employment in Cincinnati declined by 200 in February, to 632,700. The decline occurred in nonmanufacturing, with seasonal losses in retail trade and construction overriding gains in services. Manufacturing employment was little changed over the month. Average hourly earnings of factory production workers rose $.02 per hour, to $10.72. The average workweek was down .6 hours, to 41.2 hours.

February 1986 nonfarm wage and salary employment was up 27,000 jobs from February 1985. Services, especially business services, and retail trade registered significant increases in the nonmanufacturing sector. Important over-the-year gains were reported in transportation equipment and chemicals, lifting manufacturing employment 3,800, to 148,200 in February 1986.

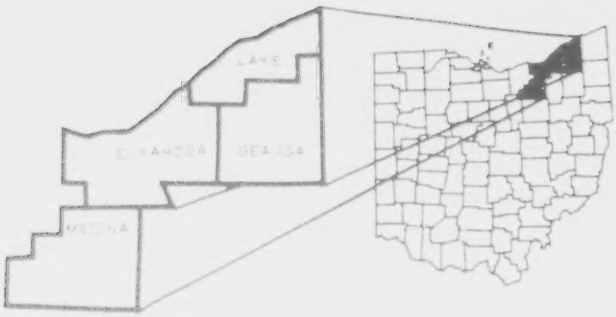
[a]Ohio data only

CLEVELAND
PRIMARY METROPOLITAN STATISTICAL AREA



Nonfarm wage and salary employment in Cleveland totaled 864,900 in February 1986, down 700 from January. Manufacturing fell 1,400, to 205,700. Reductions in metalworking machinery and metal forgings and stampings accounted for most of the loss. Employment in nonmanufacturing rose 700 from January, to 659,200. Seasonal declines in construction and retail trade were more than offset by increases in local schools and in services. Manufacturing production workers earned an average of $11.39 per hour for a workweek of 41.9 hours in February, up $.05 and .1 hours from the previous month.

Nonagricultural employment rose 19,800 from February 1985 to February 1986. Important increases occurred in business and health services, and in retail trade, although virtually all nonmanufacturing categories registered gains. Manufacturing industries declined 6,400 over the year. Losses were recorded in all durable-goods industries, with greatest declines in metalworking machinery, construction and related machinery, and metal forgings and stampings.

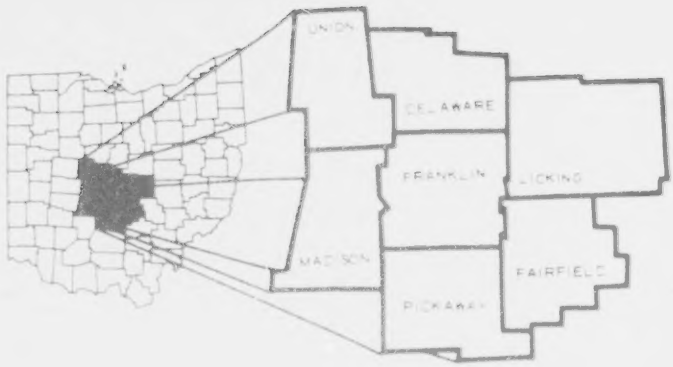
COLUMBUS
METROPOLITAN STATISTICAL AREA



Columbus nonagricultural wage and salary employment in February, at 619,500, was down 500 from January. In nonmanufacturing, seasonal declines in retail trade and construction outweighed increases in services employment. The number of manufacturing jobs was reduced in February, especially in nonelectrical machinery. Production workers in manufacturing earned an average of $11.05 per hour, unchanged from January. They worked an average 41.0 hours per week, up .1 hours.

From February 1985 to February 1986, nonfarm employment in Columbus rose 35,300. With the exception of transportation and public utilities, employment was up in the nonmanufacturing sector. Greatest increases were reported in services and retail trade. Manufacturing had modest employment gains over the year, with improvements concentrated in transportation equipment.

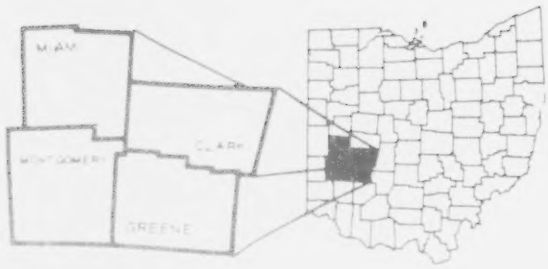
DAYTON - SPRINGFIELD METROPOLITAN STATISTICAL AREA



Nonagricultural wage and salary employment in the Dayton-Springfield area, at 409,200 in February 1986, was down 700 from January. Declines were concentrated in nonmanufacturing, with seasonal losses in retail trade and construction. Scattered minor changes in manufacturing resulted in a small net loss for the month, to 105,600. Hourly earnings of factory production workers dropped $.05, to $12.18 an hour. The average workweek, at 43.6 hours, was down .1 hours.

Over the year, nonagricultural wage and salary employment rose 13,800. Nearly all of the increase occurred in nonmanufacturing, with significant improvements in services and retail trade employment. The number of construction and federal government workers in the area also increased. In manufacturing, gains in transportation equipment were nearly overshadowed by losses in nonelectrical machinery.

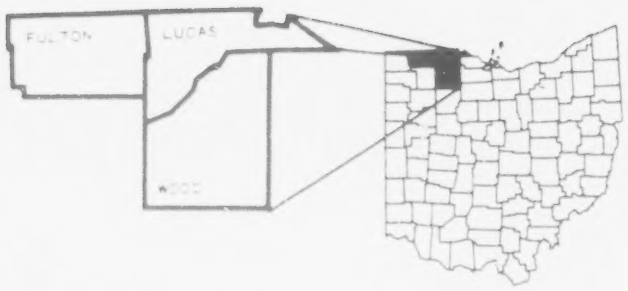
TOLEDO METROPOLITAN STATISTICAL AREA



Nonfarm wage and salary establishments in Toledo employed 265,000 in February 1986, down 1,600 from January. Manufacturing declined 2,200 to 63,900 with reductions in most durable-goods industries. In nonmanufacturing, seasonal drops in retail trade and construction were more than offset by seasonal increases in state education and services. Production workers in manufacturing worked an average of 42.7 hours per week in February, down .2 hours from January. They earned $12.45, up $.04.

Toledo nonagricultural wage and salary employment increased by 8,800 between February 1985 and February 1986. The gains occurred in nonmanufacturing, especially in services and retail trade. State and local schools and colleges, finance, insurance, and real estate, and construction recorded smaller improvements. Losses in manufacturing during the period were concentrated in the procuction of durable goods, especially electric and electronic equipment and stone, clay, and glass products.

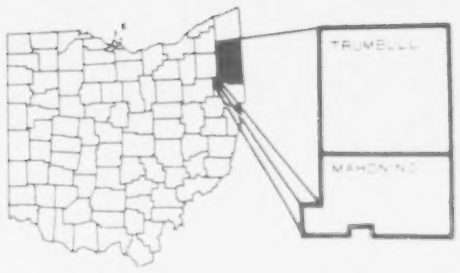
YOUNGSTOWN - WARREN METROPOLITAN STATISTICAL AREA



February nonagricultural wage and salary employment in the Youngstown-Warren area totaled 183,500, down 700 from January. Manufacturing employment, at 52,000 in February, was 800 below the level for January, as lack of orders reduced employment in primary metals. In nonmanufacturing, retail trade and construction declined seasonally. Production workers in factories grossed $13.53 per hour in February, down $.04 from January. They had an average workweek of 42.3 hours, unchanged from the previous month.

February 1986 nonfarm wage and salary employment in Youngstown-Warren was 5,000 above the total for February 1985. The over-the-year improvement occurred in retail trade and services, although all nonmanufacturing categories contributed to the gain. In manufacturing, an important increase in transportation equipment was more than offset by losses in virtually all other durable-goods industries.

Technical Notes

Civilian Labor Force Estimates

Civilian Labor Force.—Estimated number of persons 16 years of age and over employed or unemployed during week including 12th of month, distributed by place of residence.

Total Employed.—Includes nonagricultural wage and salary workers, the self-employed, unpaid family workers, domestics, agricultural workers, and persons involved in labor disputes. Employment distributed by place of residence.

Total Unemployed.—Estimated number of persons, by place of residence, who did not work during reference week and were looking for work, whether or not eligible for unemployment compensation. Includes those who did not work and were waiting to be called back to an old job or to report to a new job.

Nonagricultural Wage and Salary Employment

Collection.—Nonagricultural wage and salary employment as well as hours and earnings estimates based on monthly reports from sample of employers. Under cooperative arrangement with U.S. Bureau of Labor Statistics, Labor Market Information Division of Ohio Bureau of Employment Services mails, edits, and processes Ohio reports, which are subsequently incorporated in national data.

Industrial Classification.—Employer establishments classified by industry on basis of their principal product or service. The Standard Industrial Classification Manual (U.S. Office of Management and Budget, Washington, D.C., 1972, amended 1977) used for classification.

Coverage.—Monthly reports on employment and (for most industries) payroll and hours obtained from approximately 10,000 Ohio employers.

Coverage of Ohio Nonagricultural Employment Sample

Industry Division	Approximate Percentage Covered by Sample
Total	41
Manufacturing	60
Nonmanufacturing	35
Mining	50
Construction	20
Transportation and Public Utilities	43
Wholesale Trade	19
Retail Trade	21
Finance, Insurance, and Real Estate	44
Services and Miscellaneous	24
Government	70

Nonagricultural Employment.—Persons who worked during, or received pay for, any part of pay periods which include 12th of month, distributed by place of employment. Includes persons on paid sick leave, paid holiday, or paid vacation. Excluded are persons laid off, on strike, or on unpaid vacation during entire reporting period. Proprietors, the self-employed, unpaid family workers, farm workers, and domestic workers also excluded. Government employment covers only civilian employees. Full-time teachers considered employed during the summer vacation period, whether or not paid in those months.

Estimating Method.—Total employment is estimated from the employment of establishments reporting for two consecutive months, as follows:

$$\text{Total Employment (current month)} = \text{Total Employment (previous month)} \times \frac{\text{Sample Employment (current month)}}{\text{Sample Employment (previous month)}}$$

Benchmark Data.—Employment estimates compared annually with complete count of employment by industry. Where revisions necessary, monthly estimates adjusted to new benchmark. Following revisions to new benchmark, industry data projected forward to current month by use of sample trends. Basic source of benchmark information is tabulations of employment data, by industry and area, compiled from contribution reports of employers covered under Ohio Unemployment Compensation Law. Data are based on March 1985 benchmark.

Seasonally Adjusted Estimates

To facilitate interpretation of underlying economic trends, Civilian Labor Force and Division-level Nonagricultural Wage and Salary Employment series are presented with short-term effects of seasonal patterns removed. For methodology, see January 1986 issue.

Hours and Earnings

Method of Computing Averages.—Average hours computed by dividing total production worker hours worked during one week (the seven-day periods which include 12th of month) by number of production workers reported for such week. Average hourly earnings computed by dividing total production worker payroll for one week by total production worker hours for week. Average weekly earnings derived by multiplying average hourly earnings by average weekly hours.

Definitions.—Definitions of production or similar workers, payroll, and hours—from which average hours and earnings data are derived—follow.

Production Workers.—Includes working supervisors and all nonsupervisory workers (including group leaders and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial, and guard services, product development, auxiliary production for plant's own use (such as power plant), and record keeping and other services closely associated with production operations.

Nonsupervisory Workers.—Includes employees (not above working supervisory level) such as office and clerical workers, repairers, salespersons, operators, drivers, attendants, service employees, line installers, laborers, accountants, janitors, guards, and other employees whose services are closely associated with those of occupations listed.

Payroll.—Represents payroll for full- and part-time production, construction, or nonsupervisory workers who received pay for any part of pay periods which include 12th of month. Payroll is reported before deductions for Social Security, group insurance, withholding tax, bonds, and union dues; also includes pay for overtime, holidays, vacations, and sick leave paid directly by the firm. Bonuses (unless earned and paid regularly each pay period), tips, pay not earned in pay period reported (such as retroactive pay), and value of free rent, fuel, meals, or other payments in kind, excluded.

Hours.—Represents hours worked or paid for, during pay periods which include 12th of month, for production, construction, or nonsupervisory workers. Hours include time paid for holidays and vacations, and for sick leave when pay received directly from firm.
